

Chargefox Services and Fees

Effective from 1st October 2024

This document provides pricing for Chargefox EV charger and fleet vehicle management services.

This includes services for site hosts operating both public and private chargers, and fleet operators operating both private fleet chargers and fleet electric vehicles.

The provision of sim and data for purposes of EV charger internet connectivity is optional and at your discretion. Should Sim and Data services be required to be provided by Chargefox, this will be agreed during the initial setup of a Charger and from time to time.

Chargefox plug and data fees are calculated using a daily rate, to support a prorated billing approach, and will be invoiced to you on a monthly in arrears basis. As a result there may be slight variances in the monthly invoiced amount.

The below pricing structures provide an annual equivalence of the daily fee based on a 365.25 day year (accounting for leap years), rounded up for estimation purposes

In accordance with clause 2.3 of the Chargefox Site Host Terms and Conditions, Chargefox will retain the End User Transaction Fee.

All fees below are exclusive of GST.

Site Host – Public Charger Fees

Pricing per plug, excl. GST				
Number of Plugs	Discount	Annual ¹	Monthly ²	Daily Fee
BASE	0.0%	\$330.00	\$27.50	\$0.90
